

```

//12 less than 52
#include <stdio.h>
int main()
{
    int con, fs, sd, result;
    con = 1;
    while(con == 1)
    {
        printf("Enter your first number : ");
        scanf("%d",&fs);
        printf("Enter your secound number : ");
        scanf("%d",&sd);
        result = fs + sd;
        while(result < 52)
        {
            printf("%d is less than 52\n", result);
            break;
        }
        while(result >= 52)
        {
            printf("%d is greater than equal to 52\n", result);
            break;
        }

        printf("continues ? (1 for continues) : ");
        scanf("%d", &con);
    }
}

```

```

/*
#include <stdio.h>
int main()
{
    int con;
    con = 1;
    while(con == 1)
    {

        printf("continues ? (1 for continues) : ");
        scanf("%d", &con);
    }
}
*/

```
