```c
//18 less than 52 (loop selection)
#include <stdio.h>
int main()
{
        int con, fs, sd, result;
        con = 1;
        while(con == 1)
        {
                printf("Enter your first number : ");
                scanf("%d",&fs);
                printf("Enter your secound number : ");
                scanf("%d",&sd);
                result = fs + sd;
                if(result < 52)
                {
                        printf("%d is less than 52\n", result);
                }
                if(result >= 52)
                {
                        printf("%d is greater than equal to 52\n", result);
                }

                printf("continues ? (1 for continues) : ");
                scanf("%d", &con);
        }
}
```
